OUR AREAS OF APPLICATIONS

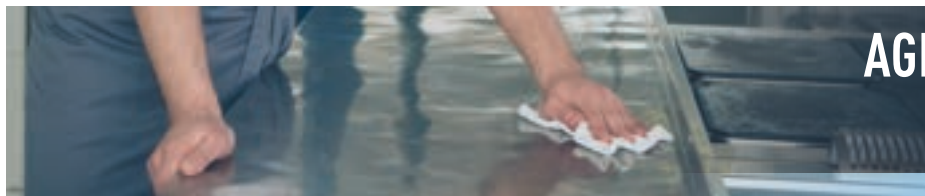

PROFESSIONAL HYGIENE

► AREAS

- General cleaning companies
- Hygiene for communities
- Hygiene in hospitals, nurseries and nursing homes

► APPLICATIONS

- Cleaning and wiping of surfaces and furniture
- Cleaning of sanitary facilities, washbasins, showers
- Cleaning of kitchens and cellars
- General cleaning

AGRI-FOOD & HORECA

► AREAS

- Agri-food industry
- Laboratories and processing plants
- Kitchens and catering
- Food distribution
- HoReCa

► APPLICATIONS

- Cleaning and disinfection of production, storage and service lines
- Maintenance of surfaces and equipment
- Kitchen towels & cloths
- Serving cloths
- Glassware cloths
- Multi-purpose wipers

MAINTENANCE & INDUSTRIAL PROCESS

► AREAS

- Industrial production lines
- Workshops & maintenance services
- General mechanics
- Metalwork & Foundry
- Wood & composite
- Nuclear and power plants
- Asbestos removal
- Construction

► APPLICATIONS

- Cleaning and maintenance of production and assembly lines
- Surface preparation before the process
- Surface finishing after process
- Degreasing
- Removal of excess, waste and dust
- Hygiene of workers
- Anti-scratch and anti-shock protection of parts and sub-assemblies

LIFESCIENCES & CRITICAL

► AREAS

- Biosciences, chemistry, optics, physics, electronics laboratories
- Pharmaceutical industry
- Electronics industry
- Optical industry
- Clean room manufacturing and assembling

► APPLICATIONS

- Cleaning of clean rooms
- Cleaning and maintenance of production and assembly lines
- Wiping of benches and equipment
- Wiping of glassware
- Wiping of optical and electronic components
- Anti-scratch and anti-shock protection of parts and sub-assemblies

HEALTHCARE & MEDICAL

► AREAS

- Hospitals, clinics and maternity wards
- Medical centers
- Paramedical practices
- Veterinary clinics and practices
- Rehabilitation centers
- Nursing homes
- Retirement homes
- Nurseries
- Fire brigade
- Ambulance services

► APPLICATIONS

- Cleaning and wiping of the operating theater
- Cleaning of patient room
- Cleaning of toilets, sinks, showers
- Cleaning and wiping of surfaces and furniture
- Cleaning of windows, light fixtures and shiny surfaces
- Hygiene of the patient
- Hygiene of the practitioner

WELLNESS

► AREAS

- Beauty centers
- Thalassotherapy centers
- SPA and wellness
- Hairdressing salons
- Beauty salons
- Barbershops
- Manicure salons

► APPLICATIONS

- Make-up Remover Wipes
- Nail care wipes
- Face, hand and foot care square
- Hair towel
- Bath towel

TRANSPORT

► AREAS

- Automotive, railway manufacturers
- Tier 1 & 2
- Shipyards
- Production and assembly lines
- Assembly and repair shops
- General mechanical engineering
- Metalwork and foundry
- Bodywork & sheet metal workshop
- Detailing

► APPLICATIONS

- Cleanliness and dusting of production lines
- Surface preparation and dusting before the process
- Polishing and surface finishing after process
- Anti-scratch and anti-shock protection of parts and sub-assemblies
- Removal of excess, waste and dust
- Degreasing
- Exterior & interior cleaning and maintenance

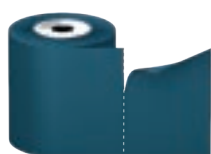

**CRITICAL CLEAN
WIPES PRODUCED IN OUR
ISO 8 CLEAN ROOM**

PRIVATE LABEL NON WOVEN WIPING RANGE

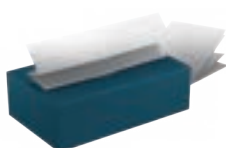

We offer our customers a complete range of dry wipe solutions to meet the most demanding applications in the following markets :

Range	Description	PROFESSIONAL HYGIENE	AGRI-FOOD & HORECA	MAINTENANCE & INDUSTRIAL PROCESS	LIFESCIENCES & CRITICAL	HEALTHCARE & MEDICAL	WELLNESS	TRANSPORT
EcoClean	EcoClean are lightweight wipes using minimal amount of detergent or biocide for high Frequency uses historically done with tissue. They are the ideal companion of a detergent or biocide sprayer to clean all the premises where disinfection or a quick clean is mandatory after each visitor. Not only the wipe unit cost is very low but its limited absorbency compared to tissue allow significant saving in the solution used. Wet and tear resistance are very good taking into account its low grammage. Its low thickness guaranties a high count of wipes per roll and therefore avoids frequent roll changes and space consuming storage.	●	●	●			●	●
SoftCell	The Softcell products are dedicated to delicate applications which requires flexibility, very low lint and quick absorption. Its good flexibility in hand provides a good agility to get into corners allowing a precise cleaning. They resist very well to majors solvents, don't contain bonding agent nor chemicals and are used in a wide range of professional applications. They absorb in average 5 or 6 times their weight in oil, solvent or water.	●	●	●		●	●	●
SorbAll	SorbAll are high loft nonwovens, very soft, mainly composed of cellulose fibers which gives them very high speed and absorption capacity. They are widely used as multiuse wiper in the food industry, collectivities, general Industry but also for more specific applications like patient toilet, or single use bath towels.	●	●	●	●	●	●	●
MultiClean	MultiClean products are very performing multiuse cloth which are used both for dry or wet cleanings. Their high ratio of cellulose confers a fast and high absorption. They are reinforced with a polypropylene armature to guarantee a good resistance to heat and a very good mechanical and abrasion resistance. They are low lint and resist to solvents.	●	●	●	●	●	●	●
Lavetiss	Lavetiss lavettes are FCC wipers widely used in the food industry, catering, kitchens and general cleaning. The range is built around a variety of nonwoven lavettes to adress all uses with various grammages and textures for a quick and efficient cleaning. The nonwoven microfiber Lavette replaces ideally knitted Microfiber with a better washing resistance and less lint. A variety of colors allows their use in HACCP protocols.	●	●			●		●
TowelChef	The TowelChef are nonwoven towels dedicated to replace woven ones for contamination in kitchens and agri-food. Their composition based on viscose guarantees a high absorption capacity. They feel like textile and resist very well to temperature. They are hygienic, rinseable and washable up to 100 times depending on the grade.	●	●					
BioTex	BioTex range gathers all the wipes dedicated to skin contact. They are used in hospitals, nursing homes, medical offices for patients or practitioners hygiene, in the asbestos removal and nuclear (as shower towels), in spa and beauty salons (as hair towels, shower towels or make-up remover wipe). Their contact is very soft dry or wet and they have a very high absorption capacity for an efficient drying.	●	●		●	●	●	
HeavyDuty Clean	HeavyDuty Clean are top of the line multiuse cloth, low lint, efficient both wet and dry for demanding wiping and cleaning. Their composition based on cellulose and polymers fibers confers a high absorption, good resistance and good stretchability. They resist very well to solvents.	●	●	●		●	●	●
ReWipe	Looking for sustainable solutions, ReWipe are wipes made from PCR (Post Consumer Recycled) materials. They are resistant, high loft and replace advantageously a sponge, a textile lavette or a all-use wipe. They resist well to common solvents and soaps.	●		●				●
PoliSoft	Polisoft are wipes characterized by there extreme softness. Ideal for surface preparation or finishing before or after a surface treatment, paint ,coating. They are available either plain or apertured. They resist well to most solvents.	●		●				●
WipeOff	WipeOff are textured wipes dedicated to remove off residues either on fragile materials in the soft white version or resistant material in the rough turquoise version. It is perfect to remove the excess of glue, caulking, paint, grease and adhesive residue. They are generally used along with solvents and have a good absorption.	●		●	●			●
K-Wipe	K-Wipe is a single use absorbing wipe very efficient on oil, grease and inks. It is widely use in workshop, agri-food industry and catering.	●	●	●	●	●		●
Critical clean	Critical clean are wipers done in ISO8 clean room under Medical GMPs dedicated to critical cleaning for the pharmaceutical, micro-optic, microelectronics, lifesiences industries and all the demanding applications where limited contamination is key.				●
